Software Design, Modelling and Analysis in UML

Lecture 21: Wrapup

2012-02-15

Prof. Dr. Andreas Podelski, Dr. Bernd Westphal
Albert-Ludwigs-Universität Freiburg, Germany

Content

- Lecture 1: Introduction
- Lecture 2: Semantical Model
- Lecture 3: Object Constraint Language (OCL)
- Lecture 4: Object Diagrams, Class Diagrams I
- Lecture 5: Class Diagrams I
- Lecture 6: Type Systems and Visibility
- Lecture 7: Class Diagrams II
- Lecture 8: Class Diagrams III
- Lecture 9: Class Diagrams IV
- Lecture 10: Core State Machines I
- Lecture 11: Core State Machines II
- Lecture 12: Core State Machines III
- Lecture 13: Hierarchical State Machines I
- Lecture 14: Hierarchical State Machines II
- Lecture 15: Hierarchical State Machines III
- Lecture 16: Methods, Live Sequence Charts II
- Lecture 17: Live Sequence Charts II
- Lecture 18: Live Sequence Charts III, Inheritance I
- Lecture 19: Inheritance II, Meta-Modelling I
- Lecture 20: Meta-Modelling II, Inheritance III
- Lecture 21: Wrapup & Questions
Wrapup: Motivation

- Lecture 1: Introduction
- Lecture 2: Semantical Model
- Lecture 3: Object Constraint Language (OCL)
- Lecture 4: Object Diagrams, Class Diagrams I
- Lecture 5: Class Diagrams I
- Lecture 6: Type Systems and Visibility
- Lecture 7: Class Diagrams II
- Lecture 8: Class Diagrams III
- Lecture 9: Class Diagrams IV
- Lecture 10: Core State Machines I
- Lecture 11: Core State Machines II
- Lecture 12: Core State Machines III
- Lecture 13: Hierarchical State Machines I
- Lecture 14: Hierarchical State Machines II
- Lecture 15: Hierarchical State Machines III
- Lecture 16: Methods, Live Sequence Charts II
- Lecture 17: Live Sequence Charts II
- Lecture 18: Live Sequence Charts III, Inheritance I
- Lecture 19: Inheritance II, Meta-Modelling I
- Lecture 20: Meta-Modelling II, Inheritance III
- Lecture 21: Wrapup & Questions
Wrapup: Motivation

Lecture 1:

• **Educational Objectives:** you should
  • be able to explain the term *model*.
  • know the idea (and hopes and promises) of *model-driven* SW development.
  • be able to explain how *UML* fits into this general picture.
  • know what we’ll do we’ve done in the course, and *why*.
  • thus be able to decide whether you want to stay with us...

Lecture 22:

• **Educational Objectives:** Capabilities for following tasks/questions.
  • How can *UML* help with software development?
  • Where is which sublanguage of *UML* useful?
  • For what purpose? With what drawbacks?

---

Wrapup: Examining Motivation

• what is a model? for example?
  • “a model is an image or a pre-image” — of what? please explain!
  • when is a model a good model?

• what is model-based software engineering?
  • MDA? MDSE?
  • what do people hope to gain from MBSE? Why? Hope Justified?
  • what are the fundamental pre-requisites for that?

• what are purposes of modelling guidelines?
  • could you illustrate this with examples?
  • how can we establish/enforce them? can tools or procedures help?
  • what’s the qualitative difference between the modelling guideline “all association ends have a multiplicity” and “all state-machines are deterministic”?
  • . . .
Wrapup: Examining Motivation

- what is UML (definitely)? why?
- what is it (definitely) not? why?
- how does UML relate to programming languages?
- what are the intentions of UML?
- what is the history of UML? Why could it be useful to know that?

- where can (what part of) UML be used in MBSE?
  - for what purpose? to improve what?
- we discussed a notion of “UML mode” by M. Fowler.
  - what is that? why is it useful to think about it?

Wrapup: Examining “The Big Picture”

- what kinds of diagrams does UML offer?
- what is the purpose of the X diagram?
- what do the diagrams X and Y have in common?
- what is a UML model (our definition)? what does it mean?
- what is the difference between well-formedness rules and modelling guidelines?

- what is meta-modelling?
  - could you explain it on the example of UML?
- what is a class diagram in the context of meta-modelling?
- what benefits do people see in meta-modelling?
- the standard is split into the two documents “Infrastructure” and “Superstructure”. what is the rationale behind that?
- in what modelling language is UML modelled?
Wrapup: Modelling Structure

- Lecture 1: Introduction
- Lecture 2: Semantical Model
- Lecture 3: Object Constraint Language (OCL)
- Lecture 4: Object Diagrams, Class Diagrams I
- Lecture 5: Class Diagrams I
- Lecture 6: Type Systems and Visibility
- Lecture 7: Class Diagrams II
- Lecture 8: Class Diagrams III
- Lecture 9: Class Diagrams IV
- Lecture 10: Core State Machines I
- Lecture 11: Core State Machines II
- Lecture 12: Core State Machines III
- Lecture 13: Hierarchical State Machines I
- Lecture 14: Hierarchical State Machines II
- Lecture 15: Hierarchical State Machines III
- Lecture 16: Methods, Live Sequence Charts II
- Lecture 17: Live Sequence Charts II
- Lecture 18: Live Sequence Charts III, Inheritance I
- Lecture 19: Inheritance II, Meta-Modelling I
- Lecture 20: Meta-Modelling II, Inheritance III
- Lecture 21: Wrapup & Questions

### Lecture 2:

- **Educational Objectives:** Capabilities for these tasks/questions:
  - Why is UML of the form it is?
  - Shall one feel bad if not using all diagrams during software development?
  - What is a signature, an object, a system state, etc.?
    - What’s the purpose in the course?
  - How do Basic Object System Signatures relate to UML class diagrams?

### Lecture 3:

- **Educational Objectives:** Capabilities for these tasks/questions:
  - Please explain/read out this OCL constraint. Is it well-typed?
  - Please formalise this constraint in OCL.
  - Does this OCL constraint hold in this (complete) system state?
  - Can you think of a system state satisfying this constraint?
  - Please un-abbreviate all abbreviations in this OCL expression.
  - In what sense is OCL a three-valued logic? For what purpose?
  - How are $\mathcal{P}(C)$ and $\tau_C$ related?
Wrapup: Modelling Structure

Lecture 4:
- **Educational Objectives:** Capabilities for following tasks/questions.
  - What is an object diagram? What are object diagrams good for?
  - When is an object diagram called partial? What are partial ones good for?
  - How are system states and object diagrams related?
  - What does it mean that an OCL expression is satisfiable?
  - When is a set of OCL constraints said to be consistent?
  - Can you think of an object diagram which violates this OCL constraint?
  - Is this UML model \( \mathcal{M} \) consistent wrt. \( Inv(\mathcal{M}) \)?

Lecture 5:
- **Educational Objectives:** Capabilities for following tasks/questions.
  - What is a class diagram?
  - For what purposes are class diagrams useful?
  - Could you please map this class diagram to a signature?
  - Could you please map this signature to a class diagram?
  - What is a stereotype? What does it mean? For what can it be useful?

Wrapup: Modelling Structure

Lecture 6:
- **Educational Objectives:** Capabilities for following tasks/questions.
  - Is this OCL expression well-typed or not? Why?
  - How/in what form did we define well-definedness?
  - What is visibility good for? Where is it used?

Lecture 7 & 8:
- **Educational Objectives:** Capabilities for following tasks/questions.
  - Please explain/illustrate this class diagram with associations.
  - Which annotations of an association arrow are (semantically) relevant?
    In what sense? For what?
  - What’s a role name? What’s it good for?
  - What’s “multiplicity”? How did we treat them semantically?
  - What is “reading direction”, “navigability”, “ownership”, . . . ?
  - What’s the difference between “aggregation” and “composition”?
**Wrapup: Modelling Structure**

**Lecture 9:**
- **Educational Objectives:** Capabilities for following tasks/questions.
  - What are purposes of modelling guidelines? (Example?)
  - When is a class diagram a good class diagram?
  - Discuss the style of this class diagram.

**Lecture 20 & 21:**
- **Educational Objectives:** Capabilities for following tasks/questions.
  - What’s the effect of inheritance on System States?
  - What does the Liskov Substitution Principle mean regarding structure?
  - What is the subset, what the uplink semantics of inheritance?
  - What’s the idea of Meta-Modelling?

**Wrapup: Modelling Behaviour, Constructive**

- Lecture 1: Introduction
- Lecture 2: Semantical Model
- Lecture 3: Object Constraint Language (OCL)
- Lecture 4: Object Diagrams, Class Diagrams I
- Lecture 5: Class Diagrams I
- Lecture 6: Type Systems and Visibility
- Lecture 7: Class Diagrams II
- Lecture 8: Class Diagrams III
- Lecture 9: Class Diagrams IV
- Lecture 10: Core State Machines I
- Lecture 11: Core State Machines II
- Lecture 12: Core State Machines III
- Lecture 13: Hierarchical State Machines I
- Lecture 14: Hierarchical State Machines II
- Lecture 15: Hierarchical State Machines III
- Lecture 16: Methods, Live Sequence Charts II
- Lecture 17: Live Sequence Charts II
- Lecture 18: Live Sequence Charts III, Inheritance I
- Lecture 19: Inheritance II, Meta-Modelling I
- Lecture 20: Meta-Modelling II, Inheritance III
- Lecture 21: Wrapup & Questions
Wrapup: Modelling Behaviour, Constructive

Main and General:

- **Educational Objectives**: Capabilities for following tasks/questions.
  - What does this State Machine mean?
  - What happens if I inject this event?
  - Can you please model the following behaviour.

Wrapup: Modelling Behaviour, Constructive

Lecture 10:

- **Educational Objectives**: Capabilities for following tasks/questions.
  - What’s the difference between reflective and constructive descriptions of behaviour?
  - What’s the Basic Causality Model?
  - What does the standard say about the dispatching method?
  - What is (intuitively) a run-to-completion step?

Lecture 11:

- **Educational Objectives**: Capabilities for following tasks/questions.
  - Can you please model the following behaviour.
  - What is: trigger, guard, action?
  - Please unabbreviate this abbreviated transition annotation.
  - What is an ether? Example? Why did we introduce it?
  - What’s the difference: signal, signal event, event, trigger, reception, consumption?
  - What’s a system configuration?
  - When is an object stable (intuitively, formally)?
Lecture 12 & 13:

- **Educational Objectives:** Capabilities for following tasks/questions.
  - What is a transformer? Example? Why did we introduce it?
  - What is a re-use semantics? What of the framework would we change to go to a non-re-use semantics?
  - What labelled transition system is induced by a UML model?
  - What is: discard, dispatch, commence?
  - What’s the meaning of stereotype “signal,env”?
  - Does environment interaction necessarily occur?
  - What happens on “division by 0”?

Lecture 14:

- **Educational Objectives:** Capabilities for following tasks/questions.
  - What is a step (definition)? Run-to-completion step (definition)? Microstep (intuition)?
  - Do objects always finally become stable?
  - In what sense is our RTC semantics not compositional?

Lecture 15:

- **Educational Objectives:** Capabilities for following tasks/questions.
  - What’s a kind of a state? What’s a pseudo-state?
  - What’s a region? What’s it good for?
  - What is: entry, exit, do, internal transition?
  - What’s a completion event? What has it to do with the ether?

Lecture 16:

- **Educational Objectives:** Capabilities for following tasks/questions.
  - What’s a state configuration?
  - When are two states orthogonal? When consistent?
  - What’s the depth of a state? Why care?
  - What is the set of enabled transitions in this system configuration and this state machine?
Lecture 17:

- **Educational Objectives**: Capabilities for following tasks/questions.
  - What’s a history state? Deep vs. shallow?
  - What is: junction, choice, terminate?
  - What is the idea of “deferred events”?
  - What is a passive object? Why are passive reactive objects special? What did we do in that case?
  - What’s a behavioural feature? How can it be implemented?

---

Wrapup: Modelling Behaviour, Reflective

- Lecture 1: Introduction
- Lecture 2: Semantical Model
- Lecture 3: Object Constraint Language (OCL)
- Lecture 4: Object Diagrams, Class Diagrams I
- Lecture 5: Class Diagrams I
- Lecture 6: Type Systems and Visibility
- Lecture 7: Class Diagrams II
- Lecture 8: Class Diagrams III
- Lecture 9: Class Diagrams IV
- Lecture 10: Core State Machines I
- Lecture 11: Core State Machines II
- Lecture 12: Core State Machines III
- Lecture 13: Hierarchical State Machines I
- Lecture 14: Hierarchical State Machines II
- Lecture 15: Hierarchical State Machines III
- Lecture 16: Methods, Live Sequence Charts II
- Lecture 17: Live Sequence Charts II
- Lecture 18: Live Sequence Charts III, Inheritance I
- Lecture 19: Inheritance II, Meta-Modelling I
- Lecture 20: Meta-Modelling II, Inheritance III
- Lecture 21: Wrapup & Questions
Wrapup: Modelling Behaviour, Reflective

Lecture 18 & 19:

- **Educational Objectives**: Capabilities for following tasks/questions.
  - Is each LSC description of behaviour necessarily reflective?
  - There exists another distinction between “inter-object” and “intra-object” behaviour. Discuss in the context of UML.
  - What does this LSC mean?
  - Are this UML model’s state machines consistent with the interactions?
  - Please provide a UML model which is consistent with this LSC.
  - What is: activation (mode, condition), hot/cold condition, pre-chart, cut, hot/cold location, local invariant, legal exit, hot/cold chart etc.? 

---

Wrapup: Inheritance

- Lecture 1: Introduction
- Lecture 2: Semantical Model
- Lecture 3: Object Constraint Language (OCL)
- Lecture 4: Object Diagrams, Class Diagrams I
- Lecture 5: Class Diagrams I
- Lecture 6: Type Systems and Visibility
- Lecture 7: Class Diagrams II
- Lecture 8: Class Diagrams III
- Lecture 9: Class Diagrams IV
- Lecture 10: Core State Machines I
- Lecture 11: Core State Machines II
- Lecture 12: Core State Machines III
- Lecture 13: Hierarchical State Machines I
- Lecture 14: Hierarchical State Machines II
- Lecture 15: Hierarchical State Machines III
- Lecture 16: Methods, Live Sequence Charts II
- Lecture 17: Live Sequence Charts II
- Lecture 18: Live Sequence Charts III, Inheritance I
- Lecture 19: Inheritance II, Meta-Modelling I
- Lecture 20: Meta-Modelling II, Inheritance III
- Lecture 21: Wrapup & Questions
Wrapup: Inheritance

Lecture 20 & 21:

- Educational Objectives: Capabilities for following tasks/questions.
  - What’s the effect of inheritance on LSCs, State Machines, System States?
  - What’s the Liskov Substitution Principle?
  - What is commonly understood under (behavioural) sub-typing?
  - What is the subset, what the uplink semantics of inheritance?
  - What is late/early binding?
  - What’s the idea of Meta-Modelling?

Meta
Hmm...

- Open book or closed book...?

- "What happens if we send over this... to..."

**Question:**

1. Transitive reflexive closure

2. Uplink semantics/has inc.

3. OCL exercises

\[ R \subseteq A \times A \]

\[ R^* = \{ (a, b) | \exists n \geq 0 \quad (a; a_1; \ldots; a_n) \in R \quad \forall 1 \leq i \leq n \quad a \neq a_i \land b = a_n \} \]

```
    C
   / \  
  D   A
```

```
    "initial": \triangle
    "initial*": \exists = \exists
    "final": R^* \subseteq R^* \subseteq R^* 
```
OCL

Rest of slices of one mask differs by at most 2

Context M inv:

\[ s_1 \rightarrow \forall s_2 (|s_1 \rightarrow \forall (s_2 \mid \text{abs}(s_1.r - s_2.r) \leq 2)) \]
